THE NADDENT PATE.

To touch a broken lute,
To strike a jungled string.
To strike a jungled string.
To strive with tourns forever mote
The dear old tunes to sing—
it moder into could any heart belait?
! dear child, sever to sing at all!

To sigh for pleasure flowti, To weep lor withered flaw To count the bleasing on have known, test with the vaulabed hours,— What medder fats could any heart belial? Alas: dear child, as'er to have known them all!

To drame of love and rest,
To hanw the dream has past,
To har within an aching hear!
Only a void at last,
What midder late could say heart beleil?
Also: dear child no'er to have loved at sill

To trust an unknown grad,
To hope hat sit in vain;
Over a lar of biles to brood,
Only to find it pala,—
What modder late could any sout belait?
Alse! dear child, never to hope at all?

Book says: All horses must not be fed in the same proportion, without regard to their ages, their constitution, and their work; because the Impropriety of such practice is self-evident. Yet it is constantly done, and is the basis of disease of

Never use bad hay on account of the cheapness, for there is no proper nourishment in it.

Damaged corn is exceedingly injurious because it brings on inflammation of the bowels and skin diseases. Chaff is better for old horses than liny, because they car

chew and digest it better.

When a horse is worked hard, its food should be chiefly oats; if not worked cause oats contains more nourishment and esh-making material than any other food: hav not so much.

Rack feeding is wasteful. The better plan is to feed with chopped hay, from a manger, because the food is not then thrown out, and is more easily chewed

and digested.

Sprinkle the hay with water that has salt dissolved in it, because it is pleasant to the animal's taste, and more easily digested. A teaspoonful of salt in

bucket of water is sufficient. A HAY DRYING MACHINE.-It will no doubt be interesting to our farmers, during this peculiar season, when so much hav has been lost by wet weather to learn that an Englishman has invented a machine for artificial heat that successfully replaces the summer sun. The London Times says: We witnessed the operation of hay drying hy artificial heat at Gillwell Park, near Chinford, Essex, the residence of the inventor, Mr. William Alfred Gibbs. After some years of practical experimenting, Mr. Gibbs has brought his invention into the following shape: A portable stove, con-structed of plate Iron, is surmounted by a fun, which is driven by a belt from u three-horse power portable stenm engine; gases from the coke fire, together with a volume of warmed air, which passes through a chamber surrounding the inner chamber of the stove, and blows the hot current, at a temperature of 400 degrees Fahrenheit or more, into the dryer. against the power of six stout fellows be ed upon the poop on hearing the ery, This resembles in general shape a straw could make no effectual resistance, and where he arrived just as the cutter was elevator, consisting of a sheet-irou trough six feet in breadth, twenty feet long if mounted on wheels as a portable carriage, tims of the press gang—were awaiting their embarkation.
